

BEYOND KITCHENS

MODERN VIBRANCE

A SLEEK, COMPACT DESIGN

Beyond Kitchens manufactured and built this kitchen in collaboration with the designer, David Elwood from Design & Decorate WA. Space was at a premium in this home, which made clever design and construction a must!

The number one priority was to maximise every inch of space in the small kitchen. The company has incorporated a range of cupboard and drawer configurations, including base, wall and full-height cabinetry, as well as a selection of deep and shallow soft-close drawers, which ensures the kitchen is both functional and stylish. The kitchen's cabinetry also contains a built-in European laundry.

Featuring high-gloss finishes, printed glass splashbacks and Caesarstone benchtops, as well as LED strip lighting for added warmth and ambience; the kitchen's design is 100 per cent original and highly practical.
